This memorandum serves to document a finding of corrective action complete at Pries Enterprises Inc., in Independence, Iowa (EPA ID #IAD981716806). Pries received a National Corrective Action Priority (NCAP) ranking of low on August 18, 1993. The memo also recommends a recording of a CA999 (no further action) data code in RCRA Info for Pries Enterprises Inc.

Pries Enterprises, Inc. manufactured extruded aluminum products. Their operations included metal forming, cleaning, and painting. They first notified EPA of their hazardous waste generation on August 14, 1987, and also reported that they were treating, storing and/or disposing of F019, K005, U134 and D002 hazardous waste at this facility. They are identified in the RCRA Info database as "non-notifier/illegal." Pries submitted a Part A permit application on November 1, 1987, but because they missed their opportunity to gain interim status by submitting the Part A in 1980, and since there was no other window of opportunity in the form of a new regulation bringing them into RCRA, they did not gain interim status. They were simply an illegal TSDF.

EPA received several complaints of mismanagement of hazardous waste, including referrals from Iowa Occupational Safety and Health Administration (IOSHA) and Iowa Department of Natural Resources (IDNR), for this facility. EPA conducted an inspection on February 11, 1988, found violations and issued a Complaint and Compliance Order to Pries on September 30, 1988. The Complaint alleged storage of 49 drums of caustic waste for greater than 90 days without benefit of a permit or interim status, failure to have aisle space, training records, and a contingency plan. There were no allegations of onsite disposal of hazardous waste. The Complaint assessed a penalty of \$36,812 for these violations. The Complaint was settled on April 3, 1991, with a penalty of \$27,600 and agreement to conduct closure of the storage area.

Pries' closure plan was public noticed on November 7, 1991, certified closed on June 12, 1992, and verified closed by the EPA on June 17, 1992.

A RCRA facility assessment (RFA) equivalent preliminary assessment/site investigation (PA/SI) was conducted. The report is dated January 20, 1992. The RFA identified four (4) solid waste management units (SWMU). They were the drum storage area, parts washer, underground waste oil storage tanks, and the wastewater treatment unit. The RFA recommended no further action for the parts washer and the wastewater treatment unit. The drum storage area was undergoing RCRA closure concurrent with the RFA and was deferred to that activity. The underground waste oil storage tanks were recommended for annual leakage testing but nothing more. There were no areas of concern identified during the RFA.

This facility has clean closed their regulated unit. They had an RFA where no additional remediation was recommended. EPA determined that a RCRA facility investigation (RFI) would not be necessary on January 23, 1992. Pries did not have a permit or interim status so public notice of permit denial is not necessary.

This section provides demographic information regarding the community surrounding the facility. OTIS compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2000 US Census data, and are accurate to the extent that the facility latitude and longitude listed below are correct. The latitude and longitude are obtained from the EPA Locational Reference Table(LRT) when available.

Report Description

This report provides a complete listing of evaluation, violation and enforcement activities for each Handler. Below the Handler ID information, the data is presented in three sections; evaluations, violations and enforcements. Comments, referred to as Notes, are provided in the respective sections for evaluations and violations. Violation coverage areas are shown horizontally across the page in the evaluation data section. Since evaluations are included regardless of whether or not violations are identified, this report also serves as a useful management tool for tracking progress made towards meeting RECAP commitments.
